OPPOSITION TO MOTION FOR EXTENSION OF TIME

Fantasma Networks, Inc. ("Fantasma") opposes the Motion For Extension of Time filed September 20, 2000, by Motorola, Inc. in the above-captioned proceeding.

Motorola has asked for an extension of time to file reply comments so that it may respond to technical studies that have been submitted in this proceeding. In fact, although numerous comments were filed, relatively few contained significant technical assertions requiring technical analysis and response. Further, as Motorola itself recognizes, the Commission will accept further comments in this proceeding once test data has been furnished by NTIA. At that time, all parties will have ample opportunity to address issues relating to spectrum sharing, interference potential, and other technical aspects of UWB operations.

In the meantime, delay in moving this proceeding forward will not serve the public interest. Fantasma and others are working to develop 21st Century UWB technologies that will be used in a wide array of applications for home, school, and industry. The Commission should, therefore, continue to work diligently on the issues raised in this proceeding and decline any

invitation to delay the adoption of rules that will make a variety of new and innovative services available to consumers.

Respectfully submitted,

FANTASMA NETWORKS, INC.
